PROFILE

Development economist and Research Assistant with strong quantitative training in macroeconomics and applied econometrics. My research focuses on the interactions between demographic change, labor markets, structural transformation, and fiscal sustainability in developing economies, particularly in Sub-Saharan Africa. Using cross-country data and empirical methods, I study why economic growth often fails to generate sufficient productive employment and how this affects long-term development. My long-term goal is to produce rigorous, policy-relevant research that informs evidence-based economic policy across Africa.

RESEARCH INTEREST

- Development Economics
- Labor Economics
- Political Economy
- Macroeconomics
- Public Economics
- Applied Econometrics

EDUCATION

University of Sherbrooke (Ecole de Gestion) <i>Phd Student in Economics of Development</i>	Sherbrooke, Canada <i>Sept. 2026 – Sept. 2030 (Expected)</i>
Paris School of Economics (EHESS—ENS-PSL—ENPC) <i>Master of Research in Applied Economics—Public Policy and Development</i>	Paris, France <i>Sept. 2023 – Jun. 2025</i>
ENSEA (National School of Statistics and Applied Economics) <i>Engineer Degree in Statistics and Applied Economics</i>	Abidjan, Côte d'Ivoire <i>Oct. 2020 – Aug. 2023</i>
University Alassane Ouattara <i>Master's Degree in Economics (Economic Policy and Modeling)</i>	Bouaké, Côte d'Ivoire <i>Oct. 2018 – Aug. 2019</i>
University Alassane Ouattara <i>Bachelor's Degree in Economics</i>	Bouaké, Côte d'Ivoire <i>Oct. 2015 – Aug. 2018</i>

RESEARCH EXPERIENCES

Research Assistant (Independent) — Harvard University <i>Working with Dr. Gomez Agou, Senior Fellow, Harvard Center for International Development (CID)</i>	Sept. 2025 – Present
• Conduct research on the structural determinants of recurrent sovereign debt distress in post-HIPC African economies. • Investigate how demographic change, labor market dynamics, and structural transformation shape long-run economic growth and fiscal sustainability. • Compile, harmonize, and manage cross-country datasets from IMF, World Bank, UN, and other international databases. • Develop empirical strategies and econometric models to identify macroeconomic relationships using cross-country data. • Contribute to research design, literature reviews, academic writing, and the preparation of policy-oriented and scholarly outputs.	
Research Assistant — Paris School of Economics <i>Working with Prof. Nicolas Astier</i>	Paris, France <i>Sept. 2025 – Feb.2026</i>
• Construct longitudinal datasets on electricity production, consumption, prices, and sectoral performance. • Contribute to data cleaning, documentation, and reproducible research workflows.	
Econometrician Analyst (Internship) — French National Forests Directorate <i>Working with Margaux Jacob and Prof. Tina Rambolinaza</i>	Paris, France <i>May. 2024 – Sept. 2024</i>
• Designed and implemented a Discrete Choice Experiment (DCE) to analyze preferences for renewable energy policies. • Estimated discrete choice models (logit and mixed logit) using microeconomic techniques. • Contributed to research reports informing environmental and energy policy.	

SKILLS

Programming Tools	Econometrics & Methods	Languages
• R and $\LaTeX$ (<i>Advanced</i>) • Python, Git/Github (<i>Intermediate</i>) • Microsoft Excel (<i>Advanced</i>)	• Causal inference (FE, IV, DiD) • Time series Econometrics. • Machine learning for economics	• French (<i>Native</i>) • English (<i>Fluent</i>) • German (<i>Basic</i>)
